DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-28 are rejected under 35 U.S.C. 102(e) as being anticipated by Kodama et al (6,858,370).

Kodama et al disclose a positive photoresist composition comprising an acid generator meeting the instant claim limitations. Compounds of formula (II) in columns 13-16 appear to meet the instant claim limitations. All of the exemplified compounds are sigma bonded, and compounds II-16 and compound II-22 are of the structure of the figures 2 and 3 (instant claims 6-13 and 19-22).

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Toishi et al (US 2004/0224251), Murai et al (6,437,090), Kamabuchi et al (6,818,379), Kobayashi et al (US 2003/0224290), Kamabuchi et al (US 2004/0029037) and Hatakeyama et al (US 2003/0235779) are cited for their teachings of similar compounds.
